

Technical rider | Laura Stavinoha | Merge 2019

Laura will bring the following equipment herself:

- Boss RC-505 loop station
- TC-Helicon VoiceLive 2
- Shure beta58A microphone
- Korg Minilogue
- Laptop and soundcard

In order for Laura to perform her show, the promoter needs to provide the following technical equipment:

- Table with a minimum size of 100 cm wide, 60 cm deep and 75 cm high
- Microphone stand with arm
- 1 power point
- DI to mixer, or 2 x 1/4" jack input to stereo track of mixer
- Sound engineer
- A professional high quality 3- or 4-way active speaker system

Please take the following into account:

- The show has to take place *behind* the speakers, and not at the same level or in front, in order to prevent bleeds in the loops.
- Laura needs a minimum of 20 minutes for building up the equipment and sound checking.
- Monitors need to be switched off. Laura uses in-ear monitoring through the loop station.
